Catalog Notes

The 2.9mm products shown herein are in fact 2.92mm components. Aeroflex / Inmet has elected to use 2.9mm as a "shorthand" designation for the 2.92mm standard.

Components with SMP connectors will also mate with GPO™ products; and the SMPM products mate with GPPO™ components.

The trademarks "GPO™" and "GPPO™" appearing in this catalog are trademarks of Corning Gilbert Inc.

How to use this catalog

This catalog is designed to give you a general description of the broad selection of products manufactured by Aeroflex / Inmet. When used in conjunction with our web site, you can view, print, or download detailed data sheets for each product in PDF format. Each sheet contains an outline drawing, electrical and mechanical specifications, as well as part number examples. It's easy:

1. Simply log on to www.aeroflex.com/inmet.
2. Select the first item "INMET MODEL SEARCH" in the drop-down menu box at left.
3. Enter the Model Number of the Product you wish to see, and touch enter.
4. In the results box that appears, click on the link under the "Product Page" heading, and you will be directed to web page for the selected item.
5. From here you can download a Product Data Sheet for the selected item, or you may request a quote by clicking on the "Quote" button next to the model number.

RoHS Statement

All standard catalog products designed by Aeroflex / Inmet shipped after July 1, 2006 conform to the requirements as specified in the Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003 and related Annex and Amendments on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The information presented herein is believed to be accurate, reliable and is a result of review of numerous sources including vendor submitted data sheets and certifications.

Please note:

1. Equalizers are not considered standard catalog products for the purpose of this statement.
2. Some equalizer products may already be RoHS compliant. Please direct any questions to inmet-sales@eroflex.com

Manufacturer and designer of wireless and microwave components, Aeroflex / Inmet's custom design capabilities have generated a substantial number of innovative microwave and wireless components for many markets and programs for more than 35 years.

As product development is a core value, Aeroflex / Inmet will continue to demonstrate its talent for tackling new design tasks. Unusual customer specifications which require Inmet engineering to build custom components enable Inmet to stay ahead in wireless technology by designing, creating, testing and delivering products to be used in 2G, 3G, 4G systems and beyond.

Enthusiastic reaction to Aeroflex / Inmet's total commitment to quality, selection, and just-in-time delivery of precision-made microwave and wireless components has resulted in Inmet's "preferred supplier" designation by many buyers. With notable success in advancing new products, the company's widely known lineup of off-the-shelf products is relied upon by its many customers.

Coaxial components in the DC to 65 GHz frequency range with power levels from 1 to 300 Watts, enhance Inmet's vision to become the world's number one source for coaxial attenuators. The company offers over 3,000 variations of coaxial products including:

- Coaxial Attenuators (1-300 Watt, DC-50 GHz)
- Adapters (In-series and Between Series, DC-65 GHz)
- DC Blocks (Inner, Outer, Inner/Outer Designs up to 40 GHz)
- Equalizers (High Performance, DC-40 GHz)
- Short and Open Circuits (DC-18 GHz)
- Terminations (1-300 Watts, DC-50 GHz)
- Power Dividers, (DC-26.5 GHz)
- Bias Tees (General Purpose, High Power, Broadband)

Aeroflex / Inmet also designs and manufactures multi-component hybrid products such as "between series attenuators," combination "DC block/attenuators," and "by-pass attenuators." Today, Aeroflex / Inmet is a leader in reducing the costs of components while maintaining "first class performance." On demand inventory features hundreds of off-the-shelf catalog items ready for same-day shipment, or overnight delivery.

In addition, many products are available through Richardson RFPD, or RFMW, Aeroflex / Inmet's distributors. By increasing your efficiency and profitability through our total commitment to service, support, quality, delivery, low prices and innovation, Inmet ensures your success...which in turn becomes Aeroflex / Inmet's success as well.

Model A/AH SMA 2 Watt

SHORT: 0.86"
Nominal Length

Models 2A, 6A, 18A, 23A 2AH, 6AH, 18AH, 23AH

Frequency Range..... DC to 23GHz
Available Values..... 0-10, 12, 15, 20, 30dB
Accuracy of Attenuation:
0 through 6dB.....±0.3dB maximum
7 through 20dB.....±0.5dB maximum
21 through 30dB.....±0.75dB maximum
VSWR:
DC to 4GHz.....1.15:1 maximum
4GHz to 8GHz.....1.20:1 maximum
8GHz to 12.4GHz.....1.25:1 maximum
12.4GHz to 18GHz.....1.35:1 maximum
18GHz to 23GHz.....1.40:1 maximum
Overall length in inches

	0-12dB	13-30dB
M/F	.86 ± .03	.99 ± .03
M/M	.98 ± .03	1.11 ± .03
F/F	.87 ± .03	1.00 ± .03

Complete Specification Sheet Available

Model C SMA 2 Watt

SHORTER: 0.76"
Nominal Length

Models 2C, 6C, 18C

Frequency Range..... DC to 18GHz
Available Values..... 0-10, 12, 15, 20, 30dB
Accuracy of Attenuation:
0 through 6dB.....±0.3dB maximum
7 through 20dB.....±0.5dB maximum
21 through 30dB.....±0.75dB maximum
VSWR:
DC to 4GHz.....1.15:1 maximum
4GHz to 8GHz.....1.20:1 maximum
8GHz to 12.4GHz.....1.25:1 maximum
12.4GHz to 18GHz.....1.35:1 maximum
Overall length in inches

	0-12dB	13-30dB

Model DH SMA 2 Watt

SHORTEST: 0.70"
Nominal Length

Models 2DH, 6DH, 18DH, 23DH

Frequency Range..... DC to 23GHz
Available Values..... 0-10, 12, 15, 20, 30, 40dB
Accuracy of Attenuation:
0 through 6dB.....±0.3dB maximum
7 through 19dB.....±0.5dB maximum
20 through 30dB.....±0.7dB maximum
31 through 35dB.....±1.0dB maximum
36 through 40dB.....±1.5dB maximum
VSWR:
DC to 4GHz.....1.15:1 maximum
4GHz to 8GHz.....1.20:1 maximum
8GHz to 12.4GHz.....1.25:1 maximum
12.4GHz to 23GHz.....1.35:1 maximum
Overall length in inches

	0-20dB	21-40dB
M/F	.70 ± .03	.83 ± .03
M/M	.76 ± .03	.89 ± .03
F/F	.64 ± .03	.77 ± .03

Complete Specification Sheet Available

Model AS398 SMA 1 Watt

Model AS398

Frequency Range..... DC to 3 GHz
Available Values..... 1-10, 12, 15, 20, 30dB
Accuracy of Attenuation:
1 through 10,12,15,20dB.....±0.3dB maximum
30dB.....±0.5dB maximum
VSWR:
DC to 3 GHz.....1.20:1 maximum
Overall length in inches

	1-20dB	30dB
M/F	.83 ± .05	1.02 ± .05

Complete Specification Sheet Available

Model AHC SMA 2 Watt

Model AHC

Frequency Range..... DC to 6 GHz
Available Values... 0-10, 12, 15, 20, 30, 40dB
Accuracy of Attenuation:
1 through 10dB.....±0.5dB maximum
12, 15, 20dB.....±0.7dB maximum
30dB.....±0.9dB maximum
40dB.....±1.5dB maximum
VSWR:
DC to 6 GHz.....1.20:1 maximum
Overall length in inches

	0-12,15 & 20dB	30 & 40dB
M/F	.86 ± .03	.97 ± .03

Complete Specification Sheet Available

9000 Series General Purpose 18GHz SMA Attenuators

Models 9023, 9024, 9025 (2 Watts)

Available Values 0-10, 12, 15, 20, 30, 40, 50, 60dB
Accuracy of Attenuation:
0 through 12dB.....±0.75dB maximum
13 through 20dB.....±1.00dB maximum
21 through 40dB.....±1.50dB maximum
41 through 60dB.....±2.00dB maximum

Models 9026 through 9031 (2 Watts)

Available Values..... 0-10, 12, 15, 20, 30dB
Accuracy of Attenuation:
0 through 12dB.....±0.75dB maximum
13 through 20dB.....±1.00dB maximum
21 through 30dB.....±1.50dB maximum
VSWR: (All Models)

	40GHz	0-30dB	
M/F	.88 ± .05		

Complete Specification Sheet Available

High Frequency 2.4mm & 1.85mm Series DC-50 GHz

Models 40EH and 50EH - 2.4mm (0.5 Watt)

Frequency Range..... DC to 50GHz
Available Values..... 0, 3, 6, 10, 20, 30dB
Accuracy of Attenuation:
DC - 26.5 GHz
0 through 10dB.....±0.5dB maximum
20 & 30dB.....±0.75dB maximum
26.5 - 40 GHz
0 through 10dB.....±1.0dB maximum
20 & 30dB.....±1.25dB maximum
40 - 50 GHz
0 through 10dB.....±1.5dB maximum
20 & 30dB.....±2.0dB maximum
VSWR:
DC to 26.5 GHz.....1.35:1 maximum
26.5 to 40 GHz.....1.60:1 maximum
40 to 50 GHz.....1.75:1 maximum

Models 50V - 1.85mm (2 Watts)

Frequency Range..... DC to 50GHz
Available Values..... 3, 6, 10dB

Complete Specification Sheet Available

SMP, GPO™ Series DC-26.5 GHz

Models 18G, 18P (2 Watts)

Frequency Range.....DC to 18GHz
Available Values.....0-10, 12, 15, 20 and 30dB
Accuracy of Attenuation:
0 through 6dB.....±0.4dB maximum
7 through 12dB.....±0.6dB maximum
20 and 30dB.....±0.8dB maximum
VSWR:
DC to 8GHz.....1.25:1 maximum
8GHz to 18GHz.....1.35:1 maximum

Models 26G, 26P (2 Watts)

Frequency Range.....DC to 26.5GHz
Available Values.....0, 3, 6, 10, 20 and 30dB
Accuracy of Attenuation:
DC-26.5GHz
0-4 and 6dB.....±0.6dB maximum
10dB.....±0.8dB maximum
20 and 30dB.....±1.2dB maximum
VSWR:
DC to 26.5GHz.....1.45:1 maximum

Note: GPO™ and SMP male connectors are available in full and limited detent.

Complete Specification Sheet Available

SMPM Series DC-26.5 GHz

MODELS 6MP and 18MP (2 Watts)

Frequency Range..... DC to 18GHz
Available Values.....0-10, 12, 15, 20, 30dB
VSWR:
DC to 18GHz.....1.35:1 maximum

MODEL 26MP (2 Watts)

Frequency Range.....DC to 26.5GHz
Available Values..... 3, 6, 10, 20, 30dB
VSWR:
DC to 18GHz..... 1.35:1 maximum
18 to 26.5GHz.....1.50:1 maximum

Complete Specification Sheet Available

N Series (50 and 75 Ohms)

50 Ohms
Nickel Plated Brass
Models 9070 (2 Watts)
Frequency Range.....DC to 6GHz
Available Values.....10, 12, 15, 20, 30, and 40 dB
VSWR:
DC to 2GHz.....1.25:1 maximum

Models 2N, 6N, 18N (Stainless Steel)
(2 Watts)
Frequency Range..... DC to 18GHz
Available Values.....0-10, 12, 15, 20, 30, 40, 50 and 60dB
VSWR:
DC to 4GHz.....1.15:1 maximum
4GHz to 8GHz.....1.20:1 maximum
8GHz to 12.4GHz.....1.25:1 maximum
12.4GHz to 18GHz.....1.35:1 maximum

75 Ohms
Model 4N-XX/75 (2 Watts)
Frequency Range.....DC to 4GHz
Available Values.....1, 2, 3, 6, 10, 20 and 30dB
VSWR.....1.30:1 maximum

Complete Specification Sheet Available

BNC Series (50 and 75 Ohms)

50 Ohms
Model 9033 (2 Watts)
Frequency Range..... DC to 4 GHz
Available Values..... 0-10, 12, 15, 20, 30dB
VSWR:
DC to 4GHz.....1.25:1 maximum

Model 9014 (2 Watts)
Frequency RangeDC to 4 GHz
Available Values.....40, 50 & 60 dB
VSWR:
DC to 4 GHz.....1.25:1 maximum

Model 2051 (2 Watts)
Frequency Range.....DC to 12.4 GHz
Available Values.....3, 6, 10, 20 & 30dB
VSWR:
DC to 4GHz.....1.25:1 maximum
4GHz to 8GHz.....1.30:1 maximum
8GHz to 12.4GHz.....1.35:1 maximum

75 Ohms
Model 9033-XX/75 (2 Watts)
Frequency Range..... DC to 4GHz
Available Values..... 0, 3, 6, 10, 20 & 30dB
VSWR:
DC to 1GHz.....1.10:1 maximum
1GHz to 2GHz.....1.20:1 maximum
2GHz to 4GHz.....1.35:1 maximum

SERIES PCX HIGH POWER COAXIAL TERMINATIONS, DC TO 6 GHz

The PCX Series of High Power Terminations are designed to dissipate RF power when mounted to a heat sink or chill plate. Power levels up to 500 Watts in 50 Ohm impedance are available in units with SMA and Type N male or female connectors. High stability thin film resistive elements on beryllium oxide substrates are used to insure stable VSWR performance over temperature and environmental conditions. Input power ratings are based on case temperature of 85°C maximum.

PERFORMANCE SPECIFICATIONS

Part Number	Input Power (Watts)	Frequency Range	Connector Type	VSWR Typical	Outline

Inmet inner DC blocks have a capacitor in-series with the center conductor which prevents the flow of audio and direct current (DC) frequencies while offering minimum interference to RF signals up to 50GHz. Similarly outer DC blocks have a capacitor in-series with the outer conductor and the inner/outer types have capacitors in-series with both inner and outer conductors.

Insulation material on the outer DC blocks is a PEEK shell. Applications include ground loop elimination, signal source modulation leakage suppression, system signal-to-noise ratio improvement, test setup isolation and other situations where undesired DC or audio current flows in the system.

Equalizer Overview

Aeroflex / Inmet Gain Equalizers offer simple solutions to your system slope problems. Negative, Positive, Parabolic or Fine Grain Ripple slope units can be built to meet your desired performance parameters in the DC-40 GHz frequency range. Features include:

- DC to 40 GHz, high performance
- Broadband or narrowband frequency performance
- Fine grain tuning capability
- Standard connectors: SMA, 2.9mm, N, TNC, SMP, 2.4mm
- Meets MIL-SPEC environmental requirements
- Tubular and rectangular available depending on slope and frequency requirements.

Gain equalizers are passive microwave components that have an insertion loss characteristic that varies as a function of frequency. Aeroflex / Inmet can supply both standard and custom-designed equalizers to meet the needs of commercial and military customers alike. Aeroflex / Inmet has the engineering staff devoted exclusively to this product line and can supply designs that precisely define a preset loss characteristic (fixed equalizers) or with the ability to be loss-adjusted to custom-fit the particular variable requirements needed to field-tune a system. Each equalizer application has an insertion loss characteristic and package configuration that is unique. Equalizers can be custom made to meet the desired performance parameters and package configurations for each application.

NEGATIVE SLOPE equalizers are typically used for applications to offset the excessive loss of long cable runs at high frequencies. The loss characteristic of the equalizer decreases linearly with frequency.

POSITIVE SLOPE equalizers are typically used for applications to offset excessive loss of low frequencies where waveguide transmission characteristics require an equalizer that has increasing attenuation with frequency.

PARABOLIC equalizers are used in applications where a broadband traveling wave tube (TWT) or solid state amplifier (SSA) has maximum gain at or near the center of the frequency band. The characteristics of the equalizer require maximum attenuation at mid-band and decreasing attenuation at band edges. Conversely, an inverted parabolic equalizer has decreased attenuation at mid-band and increasing attenuation at band edges.

RIPPLE equalizers are used to flatten, gain ripple and spikes in a broadband application. The narrow band attenuation is adjustable in the bands where the ripple or spikes occur and flatten the response in these sub bands.

How to Order

When ordering, state the model number, description of the component and the frequency range as given in the catalog.

You may place your order with the factory, Richardson RFPD, RFMW, or the Aeroflex / Inmet Sales Representative in your area. Factory orders will be accepted by mail, telephone or other electronic communications pending confirmation on your standard purchase order form. Minimum factory order is \$250.00 and subject to change. Quantity minimums may apply for non-standard or special order products.

Address all orders and communications to:
AEROFLEX / INMET INC.
300 Dino Drive
Ann Arbor, MI 48103 USA

Tel.: 888-244-6638 or 734-426-5553
Fax: 734-426-5557
E-mail: inmet-sales@aeroflex.com
Web: www.aeroflex.com/inmet
CAGE Code: 64671

Payment Terms

Terms are net 30 days for customers with established credit. All other orders must be prepaid, paid by credit card (VISA, MasterCard and American Express) or C.O.D.

Shipping

All sales are F.O.B. Ann Arbor, Michigan. Unless specified in your order, orders will be shipped "best way" at the company's discretion. Aeroflex / Inmet can only guarantee shipping date. Factory does not assume responsibility for carrier delays and cannot be held responsible for late, lost or damaged shipments. All claims must be filed with the carrier.

Certificate of Compliance

A Certificate of Compliance is shipped with every order. It is located on the reverse side of the packing slip.

Warranty

Aeroflex / Inmet Corporation warrants each product it manufactures to be free from defects in material and workmanship under normal use and service. Aeroflex / Inmet's only obligation under this warranty is to repair or replace, at its factory, any product or part thereof that is returned, with transportation charges prepaid, by the original purchaser within ONE YEAR from the date of shipment.

The foregoing warranty does not apply to, and in Aeroflex / Inmet's sole opinion, products that have been subject to improper or inadequate maintenance, unauthorized modifications, misuse, or operation outside the published specifications for the product.

The warranty stated above is the sole and exclusive warranty and is in lieu of all other warranties, expressed or implied, including, but not limited to, any implied warranty or fitness for any particular purpose. Aeroflex / Inmet shall not be liable for any direct or consequential injury, loss or damage incurred through the use, or inability to use any Aeroflex / Inmet product.

Returns

When returning a component to our factory, a Return Material Authorization (RMA) number must be obtained from Aeroflex / Inmet. When contacting us for an RMA number, please indicate the model number, date of the original purchase, the product lot number and the original invoice number for the purchase. Please also include as much information as possible, including test data, pertaining to the nature of the malfunction or reason for the return and point of contact information for your company.

Cancellations

Orders placed with Inmet may be cancelled only after authorization from Aeroflex / Inmet. Any authorized cancellation is subject to cancellation charges as determined by Aeroflex / Inmet. A component returned for credit will be subject to a restocking charge. If more than 6 months has elapsed since original purchase, the item may not be accepted for credit. Nonstandard components as determined by Aeroflex / Inmet, cannot be returned for credit.

Product Changes

Although all information in this catalog is current at the time of release, Aeroflex / Inmet continuing Product Improvement Program makes it necessary for Aeroflex / Inmet to reserve the right to change specifications without notice.

Quality Assurance

Aeroflex / Inmet's goal is to achieve complete customer satisfaction in the design, quality, delivery, pricing and support of our products. We continue to develop and improve our management systems and manufacturing processes in order to meet this goal.

Aeroflex / Inmet's Quality Assurance system is registered to ISO-9001. Our calibration program for inspection and test equipment complies with the requirements of MIL-STD 45662 and ANSI/NC SLZ540-1.
