

### Redesigned SMA Flange Mount SMA Adapter

Aeroflex / Inmet has redesigned this family of flange mount, SMA in-series adapters making each shorter and offering lower VSWR. The units operate in the DC to 18 GHz frequency range with a 1.20:1 maximum VSWR. They are shorter, Model 5311A, male/female unit 0.98" long compared with 1.13" in length for its predecessor; the Model 5312A male/male is 0.95" compared to 1.00" and the Model 5313A female/female is 1.01" compared with 1.25" respectively. The units are RoHS compliant and are ideal for panel-mounted applications.

Aeroflex / Inmet is a manufacturer of rf, microwave and wireless components including attenuators, terminations, cable adapters, bias tees, DC blocks, and gain equalizers.
