

New Robust 1 Watt SMA Termination

Aeroflex / Inmet is pleased to announce the availability of model 3016B which is a redesigned 18 GHz 1 Watt SMA termination. The 3016B replaces the 3016A model and incorporates a more robust internal design to lessen any potential breakage issues related to misalignment during mating. This improved design is currently available from stock and all future demand for the 3016A series will be fulfilled with the 3016B.
