

Thinking SMPM Think Aeroflex

New model 8535MP DC Blocks are ideal for a variety of modulation schemes common amongst optical networking equipment for backhaul requiring either external DC blocking capability or AC coupling between Modules.

SMPM DC Blocks 16 kHz to 50 GHz

The SMPM terminations, are offered in two models, TMP400F and TMP500F, operating from DC to 40 GHz and 50 GHz respectively. Both mate with GPPO™ and SMPM male connectors and are ideal for 40 Gb/s optical transmission systems and for test and measurement applications.

SMPM Terminations DC to 50 GHz

These high frequency components each offer top cost-to-performance ratios, and excellent quality workmanship.
