

Reverse Polarity SMA Male Termination

Designed for
Wi-Fi
WiMAX

Essential for Wi-Fi, WiMAX and other wireless networking applications; this reverse polarity SMA male termination operates DC - 6 GHz, handles 1 Watt of power and is RoHS compliant.

Polarity connectors employ the use of a female contact supplied in a plug connector and a male contact in a jack connector. This is a connector keying system that ensures reverse polarity connectors cannot mate with standard interface connectors.
