Silicon Laboratories Selects Aeroflex's Arendar[®] 2009 Testing Suite

<http://www.aeroflex.com/ats/products/prodfiles/news/04142010b.pdf>

Austin, Texas—April 14, 2010— Aeroflex announced today that Silicon Laboratories selected Arendar[®] 2009 Suite from [VI Technology](#), an Aeroflex company. [Arendar[®] 2009 Suite](#) is an enterprise software solution that utilizes a modular architecture, integrated security, comprehensive API and web accessibility to shorten test cycles and speed time-to-market.

“We are focused on increasing the efficiency of our test and development activities and VI Technology's Arendar[®] 2009 Suite offered test data and test plan management solutions that helped us achieve that goal,” said Greg Hodgson, Director of Applications and Systems Engineering, Silicon Laboratories.

“Silicon Laboratories' success with Arendar[®] 2009 Suite is a great case study that shows how much time can be saved with smart data management and test plan solutions,” said Alvaro Echeverria, vice president of business development, VI Technology.

In 2006, VI Technology helped Silicon Labs leverage the Arendar[®] platform to provide the most flexible enterprise-enabled data management system. Silicon Labs has since upgraded to Arendar[®] 2009 Suite Test Data Management Module (TDM). Arendar[®] 2009 Suite TDM enables Silicon Labs engineers to efficiently and

automatically consolidate all acquired data in one centralized location to perform sophisticated analysis, trending, and customized reporting. Once securely stored, the data is accessible from anywhere in the world via a Web dashboard.

In 2009, Silicon Labs expanded the capabilities of its data management solution to include the Arendar® 2009 Suite Test Plan Module (TPM), enabling them to create, modify, reuse and share test configurations quickly using centralized storage, definition libraries, versioning, and job tracking.

Price and availability

For more information about Arendar® 2009 Suite, contact VI Technology by visiting www.vi-tech.com/arendar2009suite or call (888) 689-4415 to speak with a VI Technology regional account manager.

About VI Technology

[VI Technology](#), an Aeroflex company, is a leading provider of turn-key automated test solutions for audio, video and communications. The Company combines expert engineering services and its award-winning test and measurement products, such as [MMTS™](#) and [Arendar®](#) enterprise software, with third-party tools to deliver enterprise test solutions. VI Technology engineers solutions to solve company-wide test problems for the semiconductor, consumer electronics, communications, defense and medical industries.

About Aeroflex

Aeroflex Incorporated is a leading global provider of microelectronic components and test and measurement equipment used by companies in the space, avionics, defense, commercial wireless communications, medical and other markets.

About Silicon Laboratories Inc.

Silicon Laboratories is an industry leader in the innovation of high-performance, analog-intensive, mixed-signal ICs. Developed by a world-class engineering team with

unsurpassed expertise in mixed-signal design, Silicon Labs' diverse portfolio of highly-integrated, easy-to-use products offers customers significant advantages in performance, size and power consumption. These patented solutions serve a broad set of markets and applications including consumer, communications, computing, industrial and automotive. For more information about Silicon Labs, please visit www.silabs.com.

All statements other than statements of historical fact included in this press release regarding Aeroflex's business strategy and plans and objectives of its management for future operations are forward-looking statements. When used in this press release, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to Aeroflex or its management, identify forward-looking statements. Such forward-looking statements are based on the current beliefs of Aeroflex's management, as well as assumptions made by and information currently available to its management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, adverse developments in the global economy; dependence on growth in customers' businesses; the ability to remain competitive in the markets Aeroflex serves; the inability to continue to develop, manufacture and market innovative, customized products and services that meet customer requirements for performance and reliability; any failure of suppliers to provide raw materials and/or properly functioning component parts; the termination of key contracts, including technology license agreements, or loss of key customers; the inability to protect intellectual property; the failure to comply with regulations such as International Traffic in Arms Regulations and any changes in regulations; the failure to realize anticipated benefits from completed acquisitions, divestitures or restructurings, or the possibility that such acquisitions, divestitures or restructurings could adversely affect Aeroflex; the loss of key employees; exposure to foreign currency exchange rate risks; and terrorist acts or acts of war. Such statements reflect our current views with respect to the future and are subject to these and other risks, uncertainties and assumptions. Aeroflex does not undertake any obligation to update such forward-looking statements.
